

SUSTAINABILITY WORKSHOP

Everyone is talking about sustainability, but what is it? ICLEI - Local Governments for Sustainability, will identify how some local governments are interpreting sustainability and present a developing framework, the STAR community Index, that will measure local sustainability through a multi-faceted set of indicators. This session will include highlights from a variety of sustainability success stories and will demonstrate the ICLEI tools and resources they are using to reach their sustainability goals.

Hear about the APWA's Center for Sustainability and learn about the skills, tools and knowledge public works professionals need to exercise sustainable leadership and to deliver services in environmentally and socially responsible ways. We will provide an overview of the mission and values of the APWA Center for Sustainability, provide a definition for sustainability in "Public Works Management" and discuss the "APWA Center for Sustainability Framework for Vibrant and Healthy Communities." This tool will assist professionals in taking an integrated, whole systems approach to public works management.

"Balancing Our Responsibilities"

SUSTAINABILITY WORKSHOP

“Balancing Our Responsibilities”.

The South Central Assembly (SCA) and the American Public Works Association (APWA) are pleased to offer our first regional sustainability workshop. This workshop, conducted by ICLEI—Local Governments for Sustainability, will use the STAR criteria to help identify and guide the region toward sustainability goals focused on economic vitality, environmental stewardship, and equity/social responsibility.

Following a “how to” workshop in the morning, attendees will work collaboratively to explore local applications of sustainability which provide a systems approach to long term service delivery. Matching newly-acquired sustainability concepts to ideas from their own community, attendees will self-select one of five facilitated sessions to attend in the afternoon. These sessions will provide an opportunity to discuss ideas, identify potential resources, and draft project proposals. The SCA will select projects from among these proposals to provide additional support over the coming year.

Building Sustainable Communities in South Central Pennsylvania

Session/Project Categories:

- Transportation
- Building & Facilities
